

GUARDSHACK™

HGS SECURITY ENCLOSURE

The HGS Series is our most secure GuardShack Enclosure yet!

The HGS is constructed with strong schedule 40 steel pipe and expanded metal. They come standard with our improved integrated Lock Shield Bracket designed to protect more styles of locks from bolt cutters.

Internal Mounting:

On the HGS all mounting points are internal and cannot be accessed unless the cage is opened. To deter prying of the cage, there is only a 3/8" gap between the pad and the enclosure.

Hinged With Gate:

Our body with gate design allows for full use of the HGS's internal dimensions, eliminating any clearance issues often allowing a smaller enclosure to be used. Additionally with this design, only one lock is needed.

Quick & Easy Installation:

For maximum security and easy installation the optional enclosure setter is available. Simply bolt the cage to the setter with the provided hardware, set in wet concrete and walk away!

Shown with optional Enclosure Setter

Model	Usable Dimensions			Enclosure Setter
	W	H	L	
HGS-1	10"	24"	22"	ES-1
HGS-2	10"	24"	30"	ES-2
HGS-3	10"	24"	40"	ES-3
