

...with all the copper and brass theft across the country, especially with backflow assemblies. Replacing them is expensive, inconvenient, and disruptive to the people, equipment, and landscaping that needs uninterrupted service.

GuardShack has developed the first and only alarm system designed specifically for backflow enclosures. A blinking red LED light warns potential thieves that the enclosure is armed. When tampered with, it gives off an ear piercing sound. To set it off, the enclosure must be raised about three inches, which eliminates false alarms when the enclosure is locked down.

**Features:**

- **Low Cost**
- **Easy to Install**
- **Retrofits to existing GuardShack units (clamshell models require 2)**
- **Battery powered ( no trenching, no electrical lines, no electricians)**
- **Easy to maintain (change batteries once a year when device is serviced or tested)**
- **Tamper resistant ( trying to disable device will set it off)**
- **Constantly blinking red LED light discourages would-be thieves**
- **Keyed on/off for service**
- **Ultraviolet and moisture resistant case**
- **Includes all mounting hardware**
- **Patented**
