

GUARDSHACK™

ACCESSORIES

EncPad™

Manufactured Enclosure Bases

The Encpad™ enclosure pad is designed to drastically reduce the amount of time it takes to install an enclosure; down to ½ an hour in most cases. Our Encpad™ is constructed of ultra tough, resilient HPDE and is virtually indistinguishable from an actual concrete slab. It comes pre-cut for your application and complete with all the hardware necessary to install. It can be used with many GuardShack™, Econo-Cage™, Protector™ and ColdWarrior™ models.

(See back page for sizing chart)

Never pour concrete again! Never a second trip to the jobsite to finish an installation!

LockShield Brackets

For extra protection against theft, we offer our **LockShield Brackets**. These attach to our enclosures and are designed to ward off bolt cutters. They can be ordered with new enclosures as well as retro-fitted for previously purchased GuardShacks. These come in standard powdercoated colors to match your GuardShack.

Bolt On Brackets

Bolt On Brackets are designed to convert your hinged GuardShack into a lift-off model for maximum use of internal dimension. These come in standard powdercoated colors to match your GuardShack.
